

Professional Development Plan

Education does not end with graduation. As an apprentice teacher, I happily participated in teacher training opportunities with Wylie ISD during the weeks before school started. As a perpetual learner, it is my intent to continue my education through various avenues. It is my intention to pursue a Master of Arts in Teaching Science from UT Dallas. Additionally, my plan involves attending seminars such as TI-Inspire workshops from UT Dallas, city-wide events like Science Day at the Zoo in Dallas, science related conventions like CAST (Conference for the Advancement of Science Teaching), and participating in STEM related associations such as STAT (Science Teachers Association of Texas) and NSTA (National Science Teachers Association).
